

and high power also  
The JPL high power also  
has been discussed widely  
by "enthusiasts" or "hobby  
Federal. During develop-  
ment special attention was  
given to ensure that the  
"enthusiasts" were not  
in a state of confusion. The  
operation of the device can  
be tested daily by using a  
simple test procedure  
which enables the operator  
to determine if the device  
is functioning properly.  
The JPL high power also  
has been discussed by the  
press as being the most  
powerful in the world.  
The JPL high power also
